Today in our chaotic and quickly changing world it is very important to learn foreign languages. Because of globalization there appeared a lot of possibilities to contact with many countries all over the world. And so there was a necessity of using a universal language.

When a person decides to learn a foreign language he wonders what way of learning to choose. This problem is very actual now. Every year we improve our knowledge trying to use the most modern and effective methods for making progress as quick as possible. That's why we showed interest and decided to analyze this problem.

Our main goal is to find out what is the most effective way. We are targeted at using information from the experience of many people.

There are many ways to study English, but many students ask which is the most effective. Unfortunately, we don't think there is a single answer that is right for every student.

Our main achievement is our research. We have made a questionnaire among the students. It showed us some results. Now we know that a lot of students prefer to watch English films, listen to music, read books. These methods are the most effective for them and besides they are interesting. What about their studies we can see that every student needs his own approach. Some went to the courses, the others trained with a tutor. Some students even chose an independent way of learning English.

We all need to improve our language skills, and now we know how to do it. And our slogan is: "Never give up! Just keep trying!" We think that all that is needed when you learn a foreign language or do something else is your wish. If you want to reach a goal you should do your best, make an effort and very soon your work will be successful.
